

Individual reflection

Week 2 | 30/3 - 4/4
.....

What do I want to learn or understand better?

I want to learn how to set up a website using Github. I already know a bit about front end web development, but I want to learn how to structure my code better, and also learn some more about the back end development we will need.

How can I help someone else, or the entire team, to learn something new?

I can probably help the team members that are unfamiliar with HTML, CSS, and JavaScript with learning the basics. Hopefully I can also guide them if they run into problems.

What is my contribution towards the team's use of Scrum?

I have attended all the meetings and been on time. I also moved some cards on our scrum board to "Done"...

We have not really gotten started with scrum yet. Our first sprint will begin on April 13th, and then we will all probably have some more to write about it.

What is my contribution towards the team's deliveries?

I have created 3 mockups - one for the mobile "Home" page, one for the mobile "Pubs" page, and one for the mobile "Map" page. The "Profile" page was created by another member.

I contributed slightly to the Project Scope document, but since my main duty was making the mockups I did not contribute as much as the other group members. However, I was active in the discussion about the scope, I just did not write a whole lot.
