Individual Reflection, Antonia Welzel

What do I want to learn or understand better?

Like the last weeks, I want to get better at writing code, especially JavaScript, so I can finish my tasks faster and also more easily. I also want to read up on the design aspects of a web page, so I can contribute with some ideas on a good design.

How can I help someone else, or the entire team, to learn something new?

I was able to share what I knew about KPIs with the team and also able to help decide which ones to use.

What is my contribution towards the team's use of Scrum?

The whole team chose the KPIs for the project and we also tried to improve our user stories and task breakdowns. I still need to get a better understanding of task breakdowns. I will also be Scrum Master next week, so I want to know more about what a Scrum Master does and also read the Scrum Master checklist written by Kniberg.

What is my contribution towards the team's deliveries?

I was not able to contribute as much to the code part of the project this week due to exams. I helped write the team reflection and the sprint retrospective.
