Individual reflection

Week 3 | 20/4/ - 24/4

What do I want to learn or understand better?

I want to study what everyone else in the group has done so I can learn exactly what they did, and how they did it. I feel like I did the least "technical things", what I did was essentially just visual, so I am not very well-versed in the more back-end stuff.

How can I help someone else, or the entire team, to learn something new?

Not entirely sure. I suppose I can share all the new things I learn while fulfilling my tasks, if they are relevant.

What is my contribution towards the team's use of Scrum?

I add the meetings to the scrum board so we can keep track of them, and I keep my tasks updated. I also attend meetings and participate in discussions.

What is my contribution towards the team's deliveries?

I have finished 3 user stories, worth a total of 11 points. I also participated in writing the Team Reflection for this week.
