Individual reflection
Week 2

What do I want to learn or understand better?

I want to better understand how to use JavaScript and learn more about HTML since those are the languages we've decided to use for this application.

How can I help someone else or the entire team to learn something new?

I can study the programming languages and if someone else too is new to them, we can help each other to learn it by discussing questions we have about it.

What is my contribution towards the team's use of Scrum?

I have written a few of our user stories that we as a team has decided we want to focus on. The next step will be to divide these into tasks, which I will help writing.

What is my contribution towards the team's deliveries?

I have been active in the team's discussion about what features we want to implement first. Also in the discussions about the graphic aspect on how we want the application to look like. I have written in the document for our project scope, for example describing our product.
